REACH STATEMENT

Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

The REACH regulation no. 1907/2006 was made effective on 1st June 2007 and is an EU regulation aimed at protecting human health and the environment from the risks of chemical substances used in manufactured and marketed products produced or imported into the EU.

Instrumentation and Control Services (Hereford) Ltd are not a manufacturer or importer of chemical substances in volumes that exceed one tonne per substance and therefore are not required to register or pre-register our products to ECHA (European Chemicals Agency). This means we are classified as a 'downstream user' as we do not hold an EU REACH registration.

ECHA current candidate list of SVHC's (Substance of Very High Concern) can be found at:

<https://echa.europa.eu/candidate-list-table>

To the best of our knowledge based on information obtained from our suppliers, supplied products to ICS Ltd do not intentionally contain any of the Substances of Very High Concern (SVHC) that exceed the maximum current limits of concentration. Should we receive new information that a supplied product contains SVCH currently on the candidate list that exceeds concentration levels >0.1% by weight we will communicate this to our customers.

For and behalf of ICS Ltd

Nigel Birch
Managing Director
